

LINKOUT FOR LIBRARIES

National Network of Libraries of Medicine, South Central Region
Houston Academy of Medicine-Texas Medical Center Library
1133 John Freeman Blvd.
Houston, TX 77030

NLM Contract No.: N01-LM-1-3515

WHAT IS LINKOUT?

- An Entrez feature that provides users with links to web-accessible relevant resources from PubMed and other Entrez databases.
- Links to publishers, aggregators, libraries, biological databases, sequence centers, and other resource Web sites.

Prediction of coronary heart disease risk in HIV-infected patients with fat redistribution

Hadigan C, Meigs JB, Wilson PW, D'Agostino RB, Davis B, Basgoz N, Sax PE, Grinspoon S.

Program in Nutritional Metabolism, Massachusetts General Hospital, and Harvard Medical School, Boston, MA 02114, USA.
chadigan@partners.org

A metabolic syndrome has been described among human immunodeficiency virus (HIV)-infected patients receiving highly active antiretroviral therapy; the syndrome is characterized by fat redistribution, insulin resistance, and dyslipidemia. We compared the 10-year coronary heart disease (CHD) risk estimates for 91 HIV-infected men and women with fat redistribution with the risk estimates for 273 age-, sex-, and body mass index (BMI)-matched subjects enrolled in the Framingham Offspring Study. Thirty HIV-infected patients without fat redistribution were also compared with 90 age- and BMI-matched control subjects. The 10-year CHD risk estimate was significantly elevated among HIV-infected patients with fat redistribution, particularly among men; however, when they were matched with control subjects by waist-to-hip ratio, the 10-year CHD risk estimate did not significantly differ between groups. HIV-infected patients without fat redistribution did not have a greater CHD risk estimate than did control subjects. In addition, the CHD risk estimate was greatest in HIV-infected patients who had primary lipodystrophy, compared with those who had either lipohypertrophy or mixed fat redistribution. Therefore, although CHD risk is increased in HIV-infected patients with fat redistribution, the pattern of fat distribution and sex are potential important components in determining the risk in this population.

Electronic Journals

- Enables a participating library to display its icon on the Abstract and Citation formats in PubMed so that patrons can access the full-text.
- LinkOut is based upon the providers of the electronic journals participation. If title is available in electronic format but the provider is not participating in LinkOut, you will not be able to access that title through PubMed.
- The LinkOut electronic journal provider will give the LinkOut Team at NLM the necessary information for your title to be correctly accessed by only your affiliates.

Printed Journals

- Via the LinkOut - SERHOLD Interface, any DOCLINE library can also choose to have an icon that indicates which PubMed articles are in that library's print collection.
- Library must have its holdings in SERHOLD.

LINKOUT HOMEPAGE:

<http://www.ncbi.nlm.nih.gov/entrez/linkout/>.

- Click on LinkOut on PubMed's blue sidebar.
- Some of the tools on this page do not apply to libraries.

LinkOut Help

- **Overview** provides information on how to participate in LinkOut. **The LinkOut and Library Holdings** is the information for libraries.
- The **FAQ** or "Frequently Asked Questions" for LinkOut Libraries lists some of the more commonly asked questions.
- View the **Setting Up LinkOut for Libraries** tutorial. This is step-by-step guide.

Utilities

- Validation is for providers who send XML files. Libraries do not use it.
- **Library Submission** is the submission utility most libraries use to submit or update their Identity Files and Holding Files.

Lists

- **All Providers** displays all LinkOut participants. Their name abbreviations (NameAbbr) are also listed.
- **Non-bibliographic Link Providers** displays some other resources available in LinkOut like OMIM or MedlinePlus.
- **LinkOut Journals** displays the journals available for LinkOut by either provider or journal name.
- **Journal Link Updates** lists the journals that have been added in the last 60 days. The lists are available by provider, journal name or date added.
- **Libraries** displays all of the libraries currently participating in LinkOut. They

are available by NN/LM region or by state. Their NameAbbrs are also listed.

References

- These resources are to assist providers of XML files. It does not pertain to libraries.

Contact Us

- linkout (linkout@ncbi.nlm.nih.gov) is to send an email to the LinkOut Team at NLM.
- **lib-linkout** (lib-linkout@ncbi.nlm.nih.gov) is to send an email to the LinkOut Team at NLM. **This the email address libraries should use.**
- linkout-new is an NLM announcement listserv on LinkOut issues.
- **library-linkout** is an NLM announcement listserv for libraries using LinkOut. **Every library that is participating in LinkOut should have at least one person subscribed to it.**
- tax-linkout is an announcement listserv for participants involved in taxonomic databases. Libraries do not need to subscribe.

PARTICIPATING IN LINKOUT

Registering

- To participate in LinkOut for Libraries, send an email to lib-reg@ncbi.nlm.nih.gov.
- Put "LinkOut Registration Request" in the subject and include the following in your message:

Library Name: *Good Medical Library*
Contact Person: *Jane Smith*
Email Address: *smith@goodmedical.org*
Phone Number: *301-123-4567*
Address: *123 Medical Ave, SomeCity, SomeState 12345*

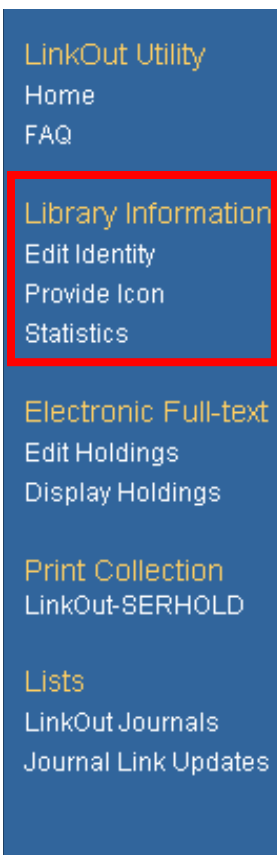

- In a month or less, the library's contact person will receive the Username and Password for the utility.

Submitting Information

- Click on the **Library Submission** link on the LinkOut homepage.
- Click on the **LinkOut Library Submission Utility** and enter your Username and Password.
- The Username and Password is case sensitive. Type it exactly as you received it from NLM.

The screenshot shows the LinkOut Library Submission Utility page on the left and the 'Enter Network Password' dialog box on the right. The page has a navigation bar with links: Nucleotide, Protein, Genome, and Structure. The main heading is 'LinkOut Library Submission Utility'. Below it, there is a paragraph explaining the utility and several links: 'LinkOut and Library Holdings', 'LinkOut Library Submission Utility', 'Tutorial: Setting Up LinkOut for Libraries', and 'Frequently Asked Questions for LinkOut Libraries'. The dialog box is titled 'Enter Network Password' and contains fields for Site (www.ncbi.nlm.nih.gov), Realm (LinkOut Files Submission), User Name (RMLtest1), and Password (password). There is a checkbox for 'Save this password in your password list' and 'OK' and 'Cancel' buttons.

- The LinkOut Utility page will display. This page includes all of the tools a library needs to maintain LinkOut.

Library Information

Edit Identity

- On the LinkOut Utility page under the Library Information section, click on **Edit Identity**.
- Add or update the Library Name, the Library's homepage URL, and the contact person's email address.

Edit Library Identity

PrId: 3289 NameAbbr: RMLtest
 Library Name:

Library/Organization Public Web Site URL:
 (Example: <http://www.goodmedical.org/library.html>)

Contact Person's Name and Email at the Library:
 (Example: [Joe Smith <smith@goodmedical.org>](mailto:Joe.Smith@goodmedical.org))

- Click on Update Identity.
- Updated information will be available around 12pm ET the next day.

Provide Icon

- On the LinkOut Utility page under the Library Information section, click on **Provide Icon**.
- For the library users to see the journals held by the library, it is recommended that libraries create icon(s).
- The icon(s) can either be stored at the library or institutional server, or be uploaded to be stored at the National Center for Biotechnology Information (NCBI) at NLM.
- Input the URL for the Full-Text and/or Print Collection icon(s) in the Input URL box(es) or the Upload box.

Provide Icon for RML test library

Input URL for an icon stored at your site, or Upload an icon to be stored at NCBI.

Note:

- size: 100 x 25 pixels recommended (maximum: 150 x 35 pixels)
- type: gif, jpeg or png files
- appearance: look like a button, use borders, not use white/transparent background.

Full-Text Icon	
<input checked="" type="radio"/> Input URL: <input type="text" value="http://www.ncbi.nlm.nih.gov/F"/> <input type="button" value="Clear"/>	<input type="radio"/> Upload <input type="text"/> <input type="button" value="Browse..."/>
<input type="checkbox"/> Use default icon	

Print Collection Icon	
<input checked="" type="radio"/> Input URL: <input type="text"/> <input type="button" value="Clear"/>	<input type="radio"/> Upload <input type="text"/> <input type="button" value="Browse..."/>
<input type="checkbox"/> Use default icon	
<input type="button" value="Proceed"/> <input type="button" value="Cancel"/>	

- Icon(s) stored at the library or institutional server cannot be part of a HTML page. It must be created and stored as an URL.
- Icon(s) must be stored on a publicly accessible site -- not on a private Intranet.
- Icons should:
 - Be no larger than 150 by 35 pixels (recommended size is 100 by 25 pixels).
 - Be a jpeg, gif or png file.
 - Have an outline.
 - Look like a button.
 - Not use a white or transparent background.
- The icon could be your institution's logo or simply consist of text stating, "Full text supplied by [library name]" or "[library name] print collection."
- Make sure that the icon is readable or easily recognizable by your library's users.
- Here are a few examples of icons:

- If you do not wish to supply an icon, check the *use default icon* selection.
- The LinkOut system will use one of the default icons below:

- Click on Proceed after you have finished making your icon selection
- Your changes will take effect around 12noon ET the next business day.

Statistics

- On the LinkOut Utility page under the Library Information section, click on **Statistics** to display the library's LinkOut related statistics.
- Patrons need to click the Icon for your library to register statistics. You may want to advertise your icon on your web page to help make the statistics more accurate for your library.
- Statistics before August 2002 are not available.

- **Access to Full-text Links** is the number of times users click on the library full-text icon on the Abstract display or full-text links on the LinkOut display.

Print Collection: LinkOut-SERHOLD

- A library with holdings data in SERHOLD can use LinkOut for print journals.
- Only those titles in PubMed will be displayed.
- Holding information will match SERHOLD data, for example, missing years or volumes recorded in SERHOLD will not show the print icon for the library.
- Libraries not using LinkOut for electronic journals may use it for print journals only. First the library must send an email requesting a Username and Password as above.

Print Holdings via NLM SERHOLD

This function is relevant to libraries that submit their holdings information to the [NLM SERHOLD](#) database.

- [Registration - add or edit library information](#)
- [Call Number Submission](#)
- [Cancellation](#)

Registering for SERHOLD

- On the Print Holding via NLM SERHOLD page, click on **Registration**.
- Enter LIBID(s) and other information.
- More than one LIBID may be entered for one LinkOut Username.
- Enter the location of your print collection.
- Enter the catalog's URL, if you wish.
- Enter the print icon URL by clicking on Provide Icon on the LinkOut Utility page under Library Information.

Print Holdings via NLM SERHOLD - Registration

Our library would like to present our print holdings information from the [NLM SERHOLD](#) database in LinkOut.

LIBID*:	<input type="text" value="RMLTES"/>
Location of the print collection (255 characters maximum): <input type="text" value="Reading Room of LinkOut Library"/>	
URL for the print collection icon: <i>After clicking Update below, use Provide Icon function on the left sidebar to enter information for your print collection icon</i>	
Library catalog URL (optional) <input type="text"/>	
<input type="button" value="Update"/> <input type="button" value="Add LIBID"/> <input type="button" value="Cancel"/>	

Print Holdings via NLM SERHOLD - Call Number Submission

Call Numbers Submission

- Call numbers can be uploaded to LinkOut via a text file.
- Click on **Call Number Submission** on the Print Holding via NLM SERHOLD page.
- You must create a text (.txt) file.
- The file must be created as:

LIBID|ISSN|tu|Call Number

where tu is the official journal name as found in Locatorplus.

- The file can be no larger than 1.5 MB.
- Call numbers can have up to 50 characters.
- Browse can help you locate the file you have created on your computer.
- Click on Upload to send the file to LinkOut.
- The updated call numbers will be available by 12pm ET.

Caution: Upload a new file will overwrite all call numbers previously sent. The file will be processed the next day. It must be a text file, and not larger than 1.5MB.

The file must have lines of the following format:

LIBID|ISSN|tu|Call Number

Provide only one call number per journal for each LIBID. Call number can be up to 50 characters long.

Please pick a file from your computer using the "Browse..." button, or input the location of your file directly.

Cancellation

- You may discontinue LinkOut-SERHOLD at any time by clicking on **Cancellation** on the Print Holdings via NLM SERHOLD page.

Print Holdings via NLM SERHOLD - Cancellation

RML test library would like to DISCONTINUE to include its SERHOLD data in LinkOut.

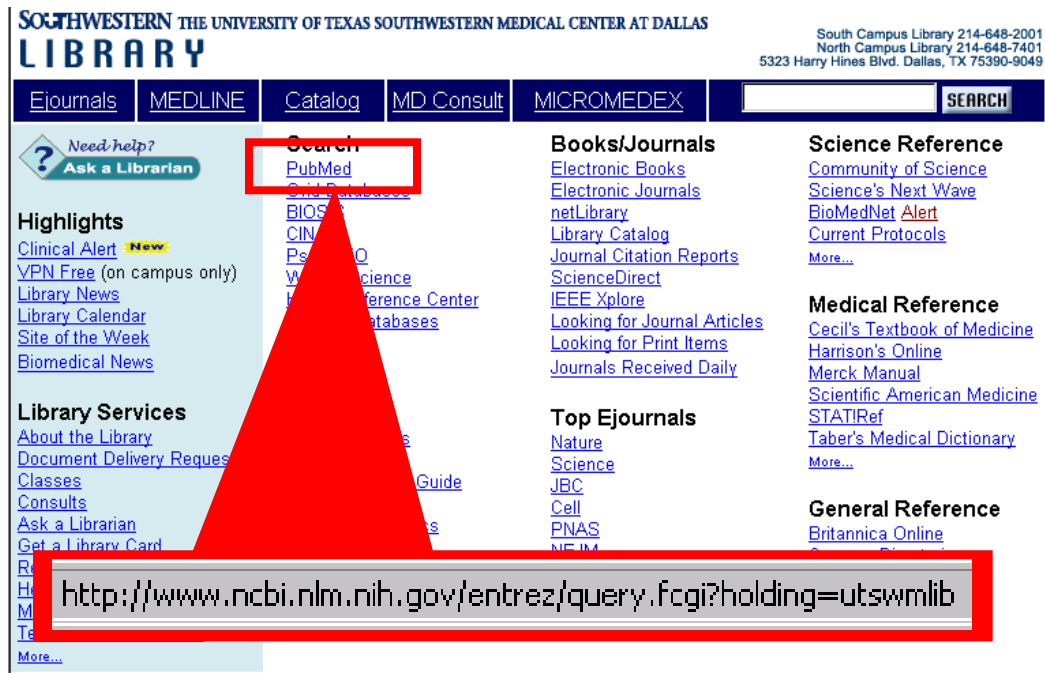

Confirm

Activating Library Holdings

- Create a link to PubMed from your library's Web site using the following URL:

[http://www.ncbi.nlm.nih.gov/entrez/query.fcgi?holding=*library name*](http://www.ncbi.nlm.nih.gov/entrez/query.fcgi?holding=<i>library name</i>)

where *library name* is your library's Username.

- The library's icon(s) will appear on all appropriate citations.
- To activate several icons (libraries), separate the Usernames by a comma:

[http://www.ncbi.nlm.nih.gov/entrez/query.fcgi?holding=*medlib,mylib*](http://www.ncbi.nlm.nih.gov/entrez/query.fcgi?holding=<i>medlib,mylib</i>)

where *medlib* and *mylib* are your libraries' icons.

- Access to the full-text is based on your electronic journals restrictions.
- Users can also access your icon(s) via Cubby.

Searching Your Library's Holdings Only

- To limit searches to your library's holdings, add to your search strategy:

`loprov`*library name* [filter]

where *library name* is the library's LinkOut Username.

The screenshot shows the PubMed search interface. At the top, the PubMed logo and the National Library of Medicine (NLM) logo are visible. Below the logos, there is a search bar with the query "stem cell transplant AND loprovutswmlib [filter]". The search results are displayed in a table with columns for Nucleotide, Protein, Genome, Structure, PMC, Taxonomy, OMIM, and Books. The first result is highlighted in yellow and is titled "Matched and mismatched allogeneic stem-cell transplantation from unrelated donors using combined graft-versus-host disease prophylaxis including rabbit anti-T lymphocyte globulin." by Finke J, Schmoor C, Lang H, Potthoff K, Bertz H. The result is from J Clin Oncol 2003 Feb 1;21(3):506-13. The page also shows a "Limits" section with "Adolescent: 13-18 years" and a "Display" section with "Abstract" selected. The "Send to" dropdown is set to "Text". The page number is 1 of 85.
